

Wascomat Dual-Use Wetclean Systems

Drycleaners: install the environmentally-safe Wascomat Wetclean System for cleaner, brighter and softer garments - and reduce your operating costs!

TD Series Wetclean Dryer models. Available in 30, 50, 75, 100 and 135 lb. capacities.

140 G-Force Extract, Solid-Mount SUPER Wetclean models. Available in 20, 30, 40, 55 and 75 lb. capacities.

220 & 300 G-Force Extract, Solid-Mount EXSM Wetclean models. Available in 65, 80 and 135 lb. capacities.

300 & 350 G-Force Extract, Soft-Mount EX Wetclean models. Available in 18, 25, 30, 40, 55, 70, 100, 200 and 250 lb. capacities.

A low voltage current is passed through the laundry by specially insulated lifters. The moisture is measured 400 times per second.

Residual Moisture Control - only available from Wascomat.

Wascomat's Wetclean TD Dryers include our exclusive, accurate and fully-automatic Residual Moisture Control (RMC) system. RMC prevents damage to garments caused by overdrying and reduces lint and wrinkles by automatically stopping the dryer when the exact pre-set moisture level is reached. The amount of residual moisture in the fabric is important for proper finishing. By not overdrying, you'll benefit from longer linen life and significant labor and energy savings!

A smart addition to traditional drycleaning methods, Wascomat dual-use Wetclean Systems are an environmentally safe, non-polluting alternative to perc. With the push of a button, the Wascomat wetcleaner converts to an ideal washer for laundering shirts, comforters, drapes and "wash-dry-fold" laundry. Call Wascomat today for more information.

Custom Programs are a Snap!

Build your own programs in Wash Program Manager and transfer them to Clarus Control using Smart Card!

Automatic and easy to program Clarus® microprocessor control lets you create up to 192 custom laundry and wetcleaning wash programs and controls 11 individual trigger signals for liquid and powder supply injection.

Wascomat's "Dual-use" Wetclean washers are equipped with Clarus® Control for superior cleaning results. Clarus manages wetcleaning and laundry washing processes by precisely controlling all important functions including water temperatures and levels, extract speed, and cleaning and wash cycle times.

Refer installation and servicing to qualified, licensed personnel. Always read installation and operating manuals and consult local codes before installation. Protect machines with properly rated, inverse-time, common-trip, industrial-type circuit breakers ONLY. Warranty void if not properly installed. Advise when placing order if dryers are for installation at altitudes in excess of 1000 feet above sea level, as this may require a gas-orifice change. Contact Wascomat for more information and availability of machines for electric services not listed. Specifications subject to change without notice. Wascomat assumes no responsibility for errors or omissions in this information.

Call today for information on the full line of Wascomat washers, dryers, wetcleaning equipment and low-cost financing and leasing.
